

## Komatsu

Komatsu began to establish themselves during the year 1921 as a diversified provider of industrial-use products and services. Still to this day, the Komatsu Group remains leading producer of construction and mining equipment. They also are active in other businesses like for example compact machines, utility equipment, logistics and other solutions-based operations, industrial machines and forest machinery. Komatsu Group is also involved in different forms of utility equipment and compact machines.

The company is built on the foundation and motto of "Quality and Reliability". Komatsu strictly upholds this policy and is totally committed to giving ground-breaking and safe services and products which meet and exceed the expectations of their customers throughout the world. This standard is a part of each piece of equipment and line which they make.

The company produces a wide array of industrial equipment like: Wheel Loaders, Articulated Dump Trucks, Mini Hydraulic Excavators, Bulldozers, Motor Graders, Dump Trucks, Compact Machines for Utility Equipment, Forklift Trucks, Feller-bunchers, Harvesters, Mini Wheel Loaders, Backhoe Loaders and Skid Steer Loaders.

Komatsu also deals in Mining and Construction Equipment, Forwarders, and Mobile Screens. They also manufacture other kinds of machinery utilized for Slag Handling, Airport Equipment, Demolition, Shield Machines, Small-diameter Pipe Jacking Machines called "Ironmole", and Tunneling machines.

Komatsu has a complete series of Hydraulic Equipment Casting Products, Casting Products and Components, Engines and Diesel Engines. They have an array Metal Forging Equipment, Stamping Press, Servo-Presses and large, medium and small-sized presses.

Some of the features that Komatsu provides comprise, Laser Cutting Machines, Sheet-Metal Machines, Press Brakes, Shears and Fine Plasma Cutting Machines. Several of their popular Machine Tools comprise: Wire Saws, Transfer Machines, Crankshaft Millers and Machining Centers.

The company has a complete series of Defense-related equipment too. Several of their many items consist of: Temperature-control Equipment for Semiconductor Manufacturing, Thermoelectric Modules, Prefabricated Commercial-Use Structures, Excimer Lasers, Packing and Transport Equipment and CSS-Net.
